GreenLine GL-1 cradle board (netlist stage, nothing routed)

usb

6 parts: C1 … U1

File: gl1_cradle_usb.kicad_sch

pins

8 parts: J2 … SP7

File: gl1_cradle_pins.kicad_sch

14 parts (13 on the BOM; plus 6 board-only item(s) such as fiducials), 10 nets, 2 copper layers, 1.60 mm, rule set US_2L_STD
Net classes (track / clearance, mm):
    Default   0.200 / 0.150   7 nets
    Power   0.400 / 0.150   3 nets
Every pin carries a global label with its net name; pins without a net carry a no-connect flag.
This schematic is generated from the design script (netlist as code). Edit the script, not these files.

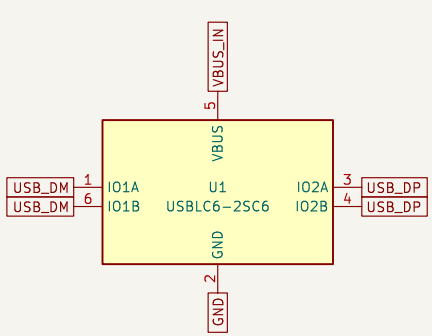

(netlist stage, nothing routed)
Connectivity is by global label; there are no wires
Generated by gleda from the design script — do not edit
