SECTION A-A on x = 0, seen from +x (visor at the right) 7:1

DETAIL C - z stack at the centre (x = 0, y = -15.2 to -8.2) 18:1

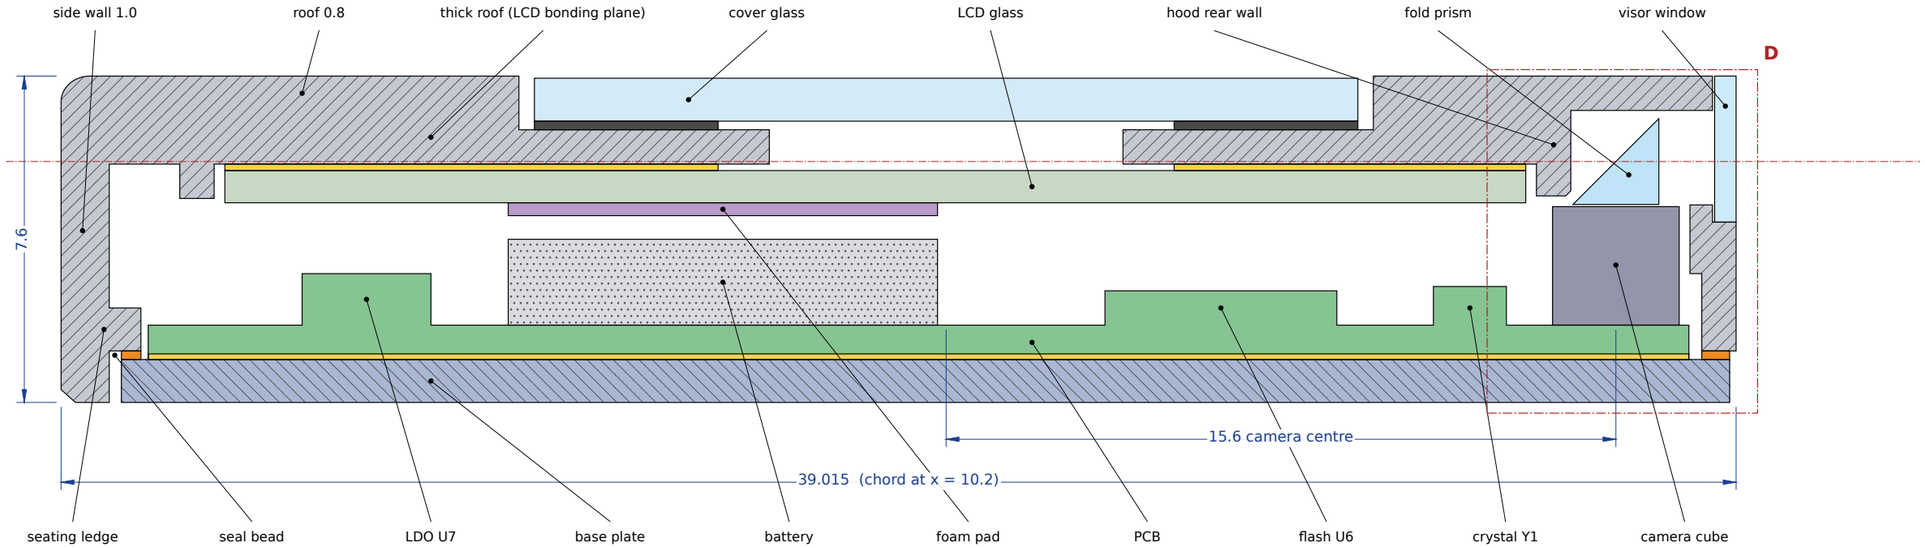

NOTES

1. Section on the plane x = 0 (the y axis through the centre). No single vertical line crosses every layer: the battery ends at y = -10.2, the ledge and tape lie outside r = 11.0. Detail C therefore spans both.
2. The YAML stack carries the PCB-to-base PSA at zero thickness. Real sheet 0.13 mm: the posts hold the PCB top at tub z = 1.8, so the base plate sits 0.13 lower and the seal bead is 0.33 instead of 0.2 (deviation D10).
3. z values are heights above the base plane.
4. Purchased parts are envelope solids.

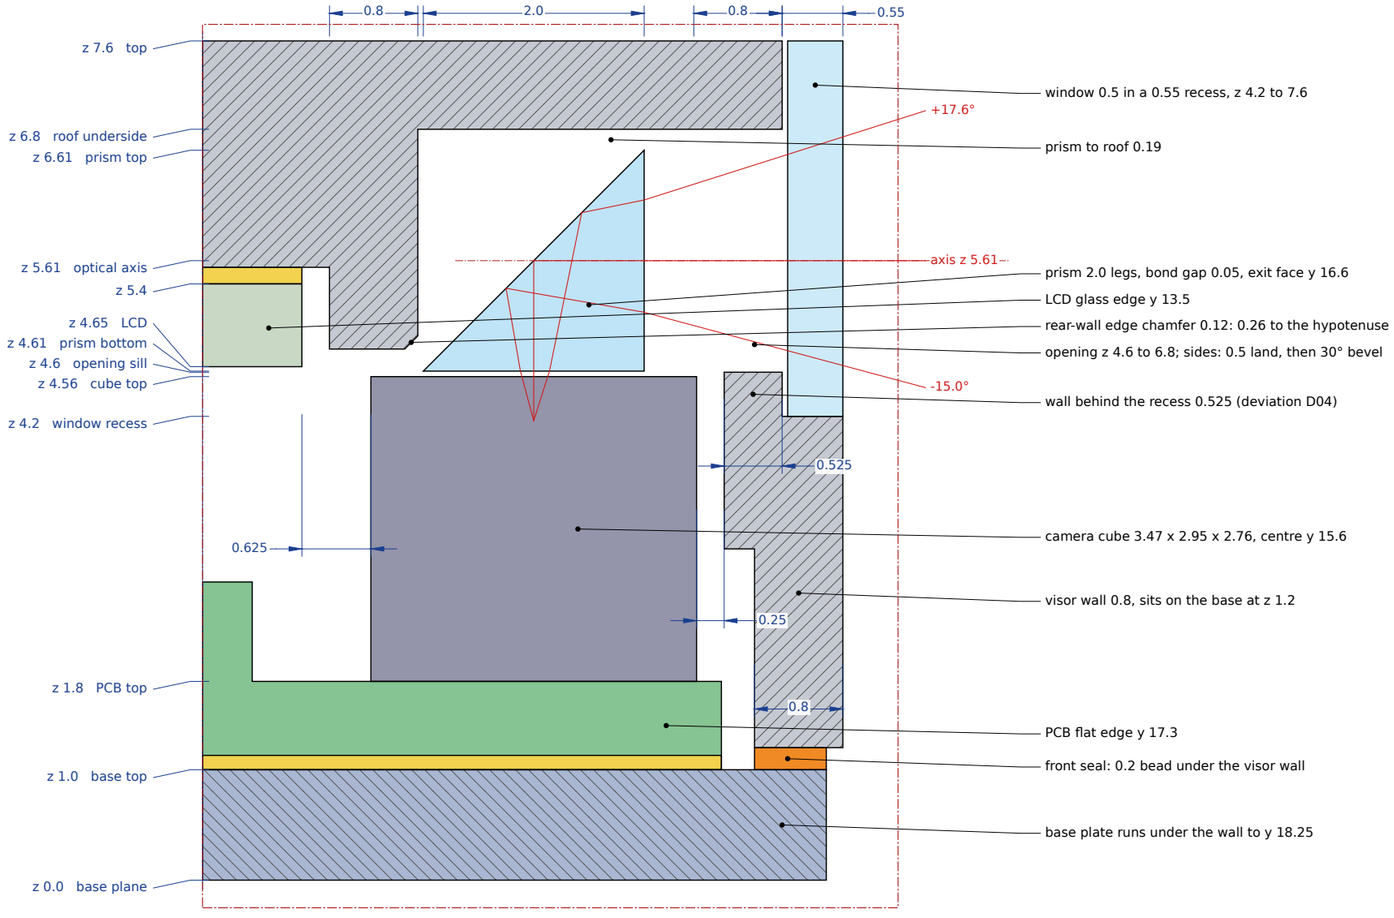

Generated from the CAD model by cad/drawings.py - dimensions are nominal model values, computed, not typed. Frame: origin at puck centre on the base plane, +x right, +y toward the visor, +z up.

TITLE	**GL1-002 Marker sections A-A and B-B**	
PROJECT / PART	GreenLine GL-1 electronic ball marker - marker assembly	
MATERIAL / FINISH	see parts list in README.md	PROCESS: assembly (bonded)
GENERAL TOLERANCE	nominal CAD dimensions, reference only	SCALE (A3) / UNITS: 7:1 / 18:1 mm
STATUS	**PROVISIONAL - not released**	DWG REV / PARAMS: A-EVT1 / B-EVT1 — SHEET / DATE: 1 of 2 2026-11-11

SECTION B-B on x = 10.2 through camera R, seen from +x (visor at the right) 7:1

DETAIL D - camera, prism and visor opening (x = 10.2) 18:1

NOTES

1. Stack at the camera: base 1.0 + PCB 0.8 + cube 2.76 + bond 0.05 + prism 2.0 = 6.61; clearance 0.19; roof 0.8; top 7.6.
2. Red: chief rays on axis and at the vertical field edges (+17.6° / -15.0°), traced exactly through the prism (n = 1.517). The lens pupil position is ASSUMED (optics.py).
3. The wall behind the window recess in front of the cube is 0.525 mm (deviation D04).
4. z = height above the base plane.

Generated from the CAD model by cad/drawings.py - dimensions are nominal model values, computed, not typed. Frame: origin at puck centre on the base plane, +x right, +y toward the visor, +z up.
